Draw either the giraffes or the naked mole rats:

Write a sentence describing one of their adaptations and how it helps the animal survive.

This Field Guide meets the following New York State learning standards:

**Math**
- 3rd grade: 3.OA.3, 3.OA.8
- 4th grade: 4.OA.2, 4.OA.3
- 5th grade: 5.OA.2

**Science**
- 3rd grade: 3-LS4-2
- 4th grade: 4-LS1-1
- 5th grade: 5-LS2-1

**Language Arts**
- 3rd grade: W.3.2
- 4th grade: W.4.2
- 5th grade: W.5.2

Go to the snow leopard habitat. Read the information on the sign to help you answer these questions:

1. What do snow leopards eat?

   ____________________________________________

   ____________________________________________

2. Is a snow leopard an herbivore, omnivore, or carnivore?

   ____________________________________________

3. Seneca Park Zoo is home to an animal that could be prey for a snow leopard. What is that animal?

   ____________________________________________

Go to the habitat of the animal you wrote down in question #3. Read the information on the sign to help you answer these questions:

4. What does this animal eat?

   ____________________________________________

   ____________________________________________

5. Is this animal an herbivore, omnivore, or carnivore?

   ____________________________________________

Complete the food chain:

snow leopard → (animal from #3) → (answer from #4)

Go to the Animals of the Savanna Building. Count the animals to fill in the chart:

<table>
<thead>
<tr>
<th>Animal</th>
<th>Number of Animals in Habitat</th>
</tr>
</thead>
<tbody>
<tr>
<td>Masai Giraffe</td>
<td></td>
</tr>
<tr>
<td>Naked Mole Rat</td>
<td></td>
</tr>
</tbody>
</table>

6. If Parker, the male giraffe, goes outside, how many giraffes and naked mole rats are still inside the building?

7. At a giraffe feeding, each giraffe ate 2 heads of lettuce. How many heads of lettuce did the zookeeper need to feed all of the giraffes?
