

Red Panda

Bingo

Red pandas are the original panda, discovered about 50 years before the giant panda. In celebration of International Red Panda Day, let's play red panda bingo. Instead of getting bingo, you can **get "panda" by completing five squares in a row**. Fill in a square by entering an animal at Seneca Park Zoo that shares the given characteristic with red pandas and complete the center square with something new you learned about red pandas. Challenge yourself to use each animal only once.
